

Beat the Heat on the Job

According to OSHA, employers are responsible for providing workplaces free of known safety and health hazards, including heat-related hazards. Use this checklist to make sure you are aware of what your employer's policies are for preventing heat illness.

A 1			
	VOII	Proto	cted?

Does your company have a Heat Illness Prevention Plan (HIPP)? Who is in charge of imp	olementing		
it on your job?			
Did your supervisor discuss heat-related hazards with you during a pre-job risk assessr	nent or job		
hazard analysis?			
Do you know where to access clean, cooled drinking water on this job?			
Is there a common area with cooling measures where you can go if the heat is too high?			
Are fans available for use on the jobsite?			
Did your employer take steps to ensure you were able to gradually get used to			
(acclimatize) to the heat exposures on your job? Research shows that workers			
are more likely to die from heat-related illness in the first weeks on the job!			
Was a work-rest schedule discussed with you regarding heat hazards?			
Are you provided with enough breaks to recover from working in the heat?			
Are strenuous tasks planned for cooler parts of the day?			
Are workers rotated to reduce prolonged exposure to heat?			
Has your employer discussed how they monitor heat levels in your working environment?			
Have you been assigned a work-buddy to help each other monitor signs of heat illness?			
Have you provided input into your employer's plan or do you feel like you can offer suggestions?			

Take Action!

Know the signs and symptoms of heat stress and heat stroke and know what to do in case of a heat-related illness, in yourself or in your coworkers. Click here or scan the QR code to the left for more: <u>Heat-related Illnesses | Heat | CDC</u>

Protect yourself from sun exposure. Click here or scan the QR code to the left for additional measures you can take: <u>HA-Skin Cancer.pdf</u>

Speak up! Be proactive and talk to your supervisor about a company Heat Illness Prevention Plan

Talk to your health care provider about any personal risks that might increase your chances of heat-related illness.

If you left boxes unchecked or want to learn more, visit CPWR's Heat Hazards webpage at www.cpwr.com/heat. Don't forget to talk to your union safety steward about a HIPP for your jobsite!
